# Who are we?

[www.ilindastone.com](http://www.ilindastone.com)

**Ilinda Stone Ltd deals with mining and processing of various natural stone products (gneiss) in broad range of colors and patterns.**

- After more than 15 years of work, we encourage the usage of natural stone in commercial, residential, government, institutional and educational buildings, as well as for various types of interior and exterior application.
- We guarantee that our products offered to architects, designers and consumers are recognized as natural and are easily distinguished from other imitative or resembling products.

# Glitz plates /handmade/

[www.ilindastone.com](http://www.ilindastone.com)

The natural stone is a building material, unique in its kind, which distinguishes you from others as it can not be produced or recreated.

*Nothing else can surpass the creativity of nature itself.*

The natural rock product is for those people with imagination across borders.

# Stenary Angle

[www.ilindastone.com](http://www.ilindastone.com)

The older it gets, the more patina, gloss and shine appear on its surface. This upper layer actually protects the stone from stains. Fears that he may accidentally break down are unfounded - unlike other building materials it does not fall apart.

*The natural stone product ages beautifully.*
